

HIGH-PRESSURE BREATHING AIR FILTRATION PANELS AND ACCESSORIES

BREATHING AIR FILTRATION PANEL CARTS

Our Breathing Air Filtration Panel Carts filter impurities and hydrocarbons from an air compressor to convert to breathable air. All components are housed in a portable and rugged Pelican case mounted on a powder-coated steel cart w/ telescopic handle for ease of storage and shipping. To meet OSHA requirements an optional CO monitor is available for continuous monitoring of carbon monoxide levels.

- 9874-EFC Panel provides up to 60 CFM (101.94 m³/hr) of air within a 5-125 PSI (0.34-8.62 bar) range.
- 9878-EFC Panel provides up to 100 CFM (169.9 m³/hr) of air within a 5-125 PSI (0.34-8.62 bar) range.
