

**ITEM NUMBER 6Y945**  
**COMBINATION 2" X 6" BELT**  
**AND DISC**  
**FINISHING MACHINE**

<b>FEATURES</b>	<b>ADVANTAGES</b>	<b>BENEFITS</b>
Direct drive power train	Greater Efficiency Quieter Operation More power to the abrasive belt and disc	Minimizes vibration Lower maintenance costs Improved workpiece finish
Heavy duty capacitor motor	Capable of running longer duty cycles underload	Improved finishing performance Powerful, Quiet, Efficient More versatile Faster material removal
Combination 2" Wide Belt & 6" Diameter Disc	Two machines in one Will grind, sand, finish, deburr, chamfer & clean	Handles a wider ranger & size if parts Greater versatility More efficient Greater operator convenience Greater productivity Lower cost per part
Adjustable belt head	Belt head adjusts vertically, horizontally, and any position in between	Faster set ups Greater operator convenience More versatile Increases productivity Improves part finish
Tilting work table	Table tilts up to 45° on disc Belt head table does not tilt only adjusts in & out	Operator can flat finish, miter or angle finish Faster set ups Improved part finish
Miter gauge	Plain & compound miters are easily obtained	Greater operator convenience & safety Greater accuracy Increased productivity
Simple belt tracking & tensioning	Fine thread adjustment screw and tensioning handle for easy fast belt changes and tensioning	Longer belt life Greater operator convenience Faster set-ups Reduces operating costs

***FEATURES***

Fully machined and balanced disc

***ADVANTAGES***

Runs vibration free  
Shaft mounted disc for more  
power and accuracy

***BENEFITS***

Greater grinding and finishing  
performance  
Improved finish work piece quality
