

Filter, MERV8 (FML6R)

MERV8 replacement pleated filter, 1 pc

Item #: [412447](#)

Replacement filter features a pleated design with the large surface area on which airborne particles can be trapped (as opposed to filters with lower rating and different design). The filter will collect mold spores, pollen, cement dust, carpet fibers, debris, lint, and insects.

With normal usage, it is recommended that you replace the filter every 3 months.
