

FADE 20-6 WHD Axial Fan

20" Axial Fan w/Assembled Housing and Damper, 3693 cfm 120/1

Item #: 45426

Variant: 120V 1~ 60Hz

- Controllable via a rotary type speed controller.
- Shallow profile with no protruding motor

Application

Fantech's FADE Series axial fans are designed to effectively and quietly handle major ventilation challenges in locations such as large warehouses without taking up a lot of valuable space.

Design

All FADE Series fans combine aerodynamically designed propeller blades and an external rotor motor expertly integrated into one unit. Fans feature a heavy gauge galvanized steel and powdercoated finish casing. WHD models are fully assembled: include a wall cabinet and backdraft damper. With fan sizes ranging from 8" to 25", Fantech's FADE Series fans move a lot of air, yet are statically and dynamically balanced for vibration-free operation. The external rotor motorized propeller provides excellent heat dissipation, even at low RPM. Rated for continuous duty.
