

Product Benefits

Lower your waste management cost by crushing your cans and pails so they can be recycled or reclaimed as scrap metal.

CONVENIENT: The BIG SQUEEZE™ uses standard shop air so there is no need for additional compressors.

SAFE: The unit will automatically stop functioning if the door is opened during operation, preventing potential injury to the operator.

FAST: The BIG SQUEEZE™ can crush a one gallon can in less than 30 seconds! Five gallon pails are crushed in less than a minute.

VERSATILE: The unit can also crush light truck and automotive filters. The typical 7" oil filter is crushed to 1.5" in just under 30 seconds.

Optional Floor Stand

Product Overview

The **BIG SQUEEZE™ Can and Pail Crusher** uses standard shop air to crush your cans, pails and filters down to a third of their original size. Not only do you save by reducing the overall waste volume, the empty containers can now be recycled or reclaimed for scrap.

The design automatically crushes then retracts, compressing a 1 gallon can in less than 30 seconds! Excess fluids simultaneously drain into a separate container so you can dispose of the liquids.

The **BIG SQUEEZE™** can also be used to crush automotive and light truck oil filters making it the perfect compactor for your shop. The unit can sit on a stable surface or purchase the optional floor stand to free up bench space.

Specifications

Item Name	BIG SQUEEZE™ Can and Pail Crusher
Item Number	10001655 10001623 Optional Floor stand frees up bench space
Application	Waste management—cans, pails and filters
Equipment Requirements	Air requirement of 85 to 115 psi 9 cfm @ 100psi.
Restrictions	All paint cans and pails must be open and not sealed when crushing. Unit is not designed for crushing of glass containers, heavy duty diesel filters with pipe cores, or items that may shatter or contain volatile vapors.
Dimensions	50" H x 24" W x 36" L
Warranty	18 Months
Shipping weight	295 lbs.
Features	Automatically crushes and retracts using standard shop air.
